

# 5 COMMON PLACES TICKS HIDE ON DOGS

## Protecting your dog from ticks

Makes sure your pet is protected against the deadly paralysis tick. Talk to your Fur Life Vet about the right product for your pet. Here are some other handy tips to help you keep your pet tick free this summer.

*Generally speaking, ticks are looking for the warmest spaces on your dogs body to latch on - so here are the places you DEFINITELY want to keep an eye on:*

### 1 UNDER THE COLLAR

Since dog collars aren't usually removed, it's possible for a tick to make a little home underneath it without anyone noticing. Make sure to remove your dog's collar from time to time and inspect for ticks.

### 2 PRIVATE AREAS

Near your dog's genitals and perianal area tend to stay warm, making them a popular spot for ticks to latch on.

### 3 INSIDE OF EARS

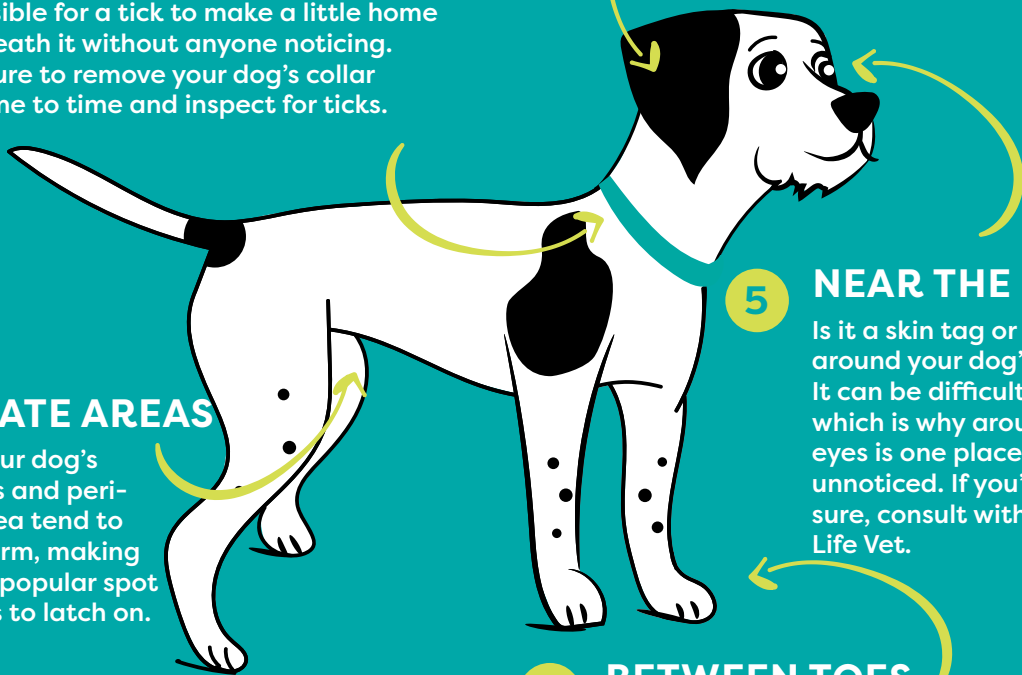

If you notice your dog scratching at its ears, ticks could be the cause. All the little crevices inside of an ear make it a popular spot for ticks to hang out.

### 5 NEAR THE EYELIDS

Is it a skin tag or is a tick around your dog's eyes? It can be difficult to tell, which is why around the eyes is one place ticks to unnoticed. If you're unsure, consult with your Fur Life Vet.

### 4 BETWEEN TOES

Ticks are excellent at hiding, so spots like between the toes are cozy and not something that's easy to see - making it a perfect place for a tick to setup camp.
